Publish your office document online

User Documentation

Note: This product is distributed on a 'try-before-you-buy' basis. All features described in this documentation are enabled. The unregistered version outputs flash files with adding watermarks.

About Office to FlashBook

Do you want to publish your Microsoft Office documents and PDF online not only as a standalone document in a separate window but also can be embedded into a web page with showing other web page content together?

All you need is the powerful and flexible Office to Flash Converter tool—Office to FlashBook Converter.

Office to FlashBook is lightning-fast software to help you show Microsoft Office documents in an vivid flash eBook which can be easy distribute on the Internet for other people to view. With using Office to FlashBook, you can always show the **before** or the next page with current one in the flash format, so that you can compare and contrast the page content more easily and clearly.

Besides helping you to display relevant pages in animated flash booklet with a new fresh look, Office to FlashBook also enables you to customize template to show your slides with background image and sound added. And you can auto play the flash booklet, even flip the pages from right to left.

With Office to FlashBook, you can convert your Microsoft Office and PDF documents into vivid and animated flash booklets which can be published online or burned to CD. The program Office to FlashBook provides multiple different output modes for you to choose: "HTML" is for publishing online, "ZIP" can be much easier for emailing, "EXE" is an intergraded format for quickly viewing, "Burn to CD" to output your digital books directly on CD-ROM.

Detail features include:

- Convert Microsoft Office and PDF to side-by-side flash booklets.
- Output in 4 different formats: HTML, EXE, Zip and Burn to CD.

HTML allows you to upload to a website to be viewed online.
EXE and Zip allow you to send to your user by email to be viewed on their computer.
Burn to CD allows you to burn to disk so you can send out with physical media.

- Provide multiple templates with previewing effects instantly.
- Set eBook title and margin manually.
- Define flash window and page background color.
- Insert background music, always play or define times.
- Set background color, image or flash.
- Show thumbnails at the very beginning with defining background color.
- Enable full screen and zoom in.
- Allow view from right to left.
- Auto and loop play slides from the very beginning.
- Export and save settings for future uses.

Using Office to FlashBook

Office to FlashBook

[-] Tutorial	
Tutorial Title	www.a-pdf.com
Hide Page Frame Bar	No
Top Margin	10
Bottom Margin	10
Left Margin	60
Right Margin	60
Flash Window Color	<input type="checkbox"/> #5B5F2C
Page Background Color	<input type="checkbox"/> #FFFFFF
[+] Background Config	
RightToLeft	No
PageMove Time	1
PageRiseOrFallTime	0.5
Slide Interval	3
AutoPlay	No
LoopPlay	Yes

(1) Tutorial Title

Customize tutorial title for showing on the top of your presentation.

(2) Hide Page Frame Bar

Hide Page Frame Bar

If don't want to show the frame bar on the left or the right side of the pages, choose "Yes" in this option.

(3) Top/ Bottom/ Left/ Right Margin:

(4) Flash Window Color

This color will be applied on all flash windows, such as the "Help" window, booklet window and so on.

(5) Page Background Color

When the page hasn't been loaded completely, it will show with the "Page Background Color" on the page.

(6) Background Config

A. Background Color

Office to FlashBook

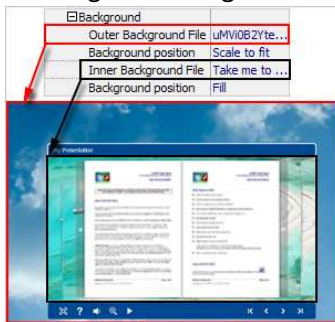

Publish your office document online

User Documentation

Define Outer or Inner background for your flipbook with gradient color or pure color (the same color for "Gradient Color A" and "Gradient Color B"). Gradient Angle is the angle between the two colors.

B. Background Image

The template enables you to add two background images: Outer Image and Inner Image. You can make Inner background image to show special information, such as advertisement or company logo, etc. There are also 11 kinds of "Image Position" for you to choose: Scale to fit, Fill, Top Left, Top Center, Top Right, Middle Left, Middle Center, Middle Right, Bottom Left, Bottom Center and Bottom Right.

(7) Right to Left

If you want to show your presentations from right to left (such as Arabic language file), then choose "Yes" in "Right to Left" option:

(8) Time Settings

PageMove Time	1
PageRiseOrFallTime	0.5

Set PageMoveTime and PageRiseOrFall Time in seconds according to your needs. (Recommended second values are 1 and 0.5).

(9) Auto and Loop Play

Slide Interval	3
AutoPlay	Yes
LoopPlay	Yes

To auto play your slides, you can set "Yes" in "AutoPlay" option; then define the Slide Interval (seconds of staying on each page); you can also set "LoopPlay->Yes" to play the slides repeatedly (after clicking the Auto Flip button , the flipbooks will be flipped by staying 3 seconds per page).

3. Thumbnails

You will enable to show page thumbnails in output flash eBook too, and set panel color in "Thumbnails->Thumbnails Background Color". You can also show the thumbnails at the very beginning of opening your flash eBook, just set "Initial Show->Thumbnails".

4. Sound Panel

Sound	
Sound File	Example1....
Sound Loops	-1

If you want to add background sound to your flipbook, such as a song or other audio file, just choose "Sound File" from your computer, then set "Sound Loops", "-1" stands for playing the sound file all the time while viewing flipbook, other value (N>0) stands for the times of playing the sound file.

After settings template, click "Apply Change" button

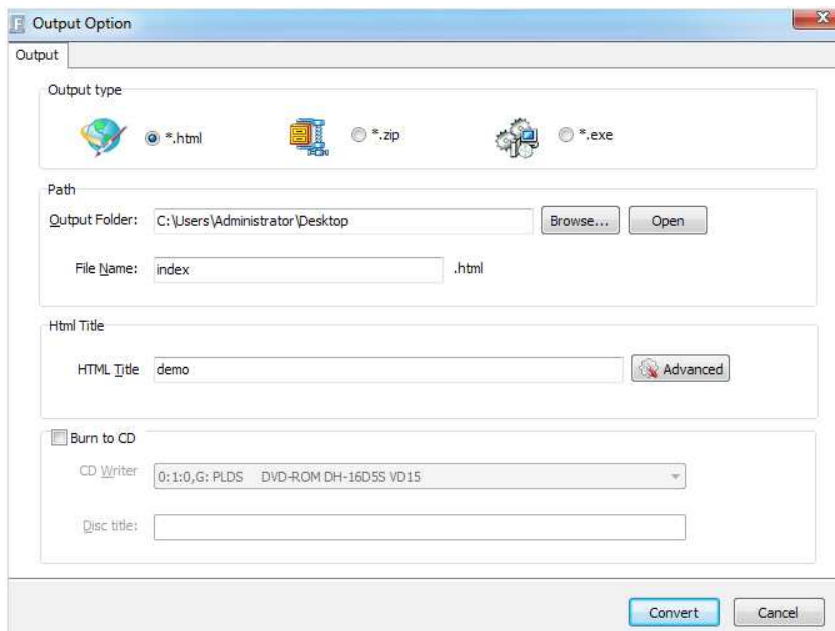

III. Output

Click "Convert to flash" button

to enter into output option interface:

Output types:

1. HTML

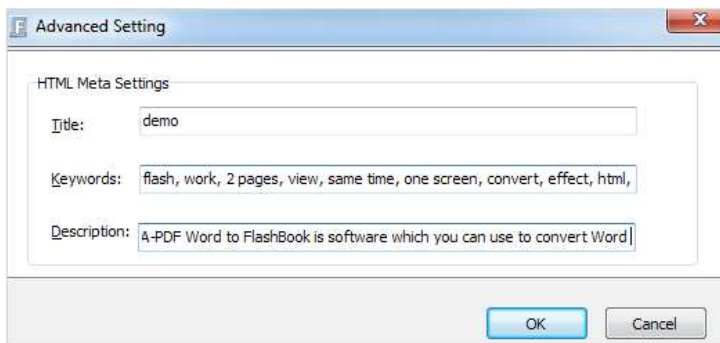

This output type is for uploading created flash booklets onto websites:

You can define HTML Title and other properties by clicking "Advanced" button:

Set Keywords and Description in the below interface:

You will get two separate files "HTML" and "SWF", a "files" folder under your defined path:

Double-click the HTML file to view your created flash presentation online.

If you want to show the Flash file on your website, make sure upload all these files under a same FTP path.

2. ZIP

This output type is for compressing the created files into an integral ZIP package which can be sending out as attachment directly. You can define HTML Advanced Settings by clicking "Advanced" icon: 

Your recipients just need to uncompress the ZIP file and then they can view the HTML flipbook instantly:

3. EXE

This type is for outputting flash presentation as a single executive file, easy storing and easy viewing:

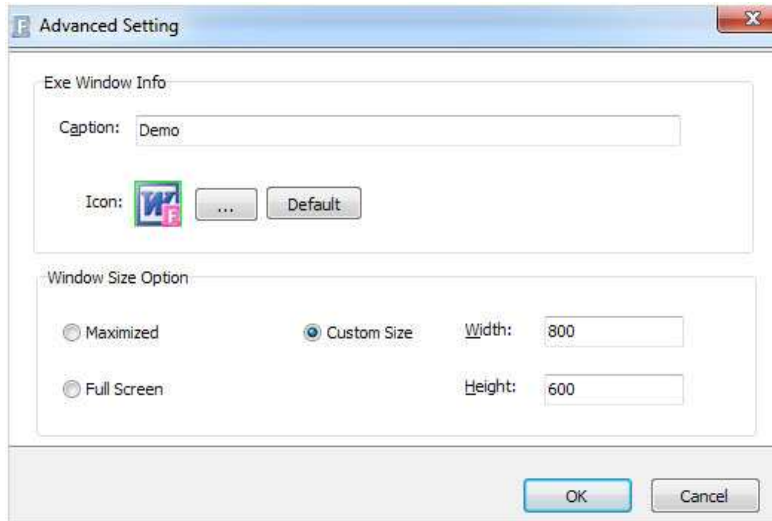

You can also define Icon and Opening Window Size in Advanced Settings:

Office to FlashBook

Publish your office document online

User Documentation

You can even **burn the output flipbook to CD**:

After choosing output type, then check the option "Burn to CD", set "CD Writer", define "Disc title", at last click **Convert** button to output flash presentation in your defined type.
