

Note: This product is distributed on a 'try-before-you-buy' basis. All features described in this documentation are enabled. The unregistered version outputs flash files with adding watermarks.

About PDF to FlashBook

As we all known, PDF documents are portable, optimally sized and secure. So PDF is used more and more as a format to exchange data between applications, and even commonly used for distributing on Internet.

In theory, your website visitors can easily download the files to their desktop or open them in a web browser. However, the truth of the matter is that opening PDF files using the Adobe Acrobat plug-in for Firefox or Internet Explorer can be a bit of hassle. It often takes a long time to open the file, and their browsers are rendered pretty much useless while they wait.

So why not convert your PDF files to more acceptable Flash format? Flash content may be displayed on various computer systems and devices, using Adobe Flash Player, which is available free of charge for common web browsers, some mobile phones and a few other electronic devices.

PDF to FlashBook is wonderful and lightning-fast software to help you convert PDF documents to animated flash eBook with always showing two pages at the same time. The powerful PDF to FlashBook converter could help you to easy generate vivid digital booklet with auto page-moving functionality, and you will be enabled to distribute the formed digital flash book on the Internet for other people to view.

With using PDF to FlashBook, you can always show the before or the next page with current one in the flash booklet, so that the eBook visitors can compare and contrast the page content more easily and clearly. And besides helping to display relevant pages in animated flash, PDF to FlashBook also enables you to design your own style digital eBook. You can add proper or your favorite background image and sound, you can also auto play the flash booklet, read the eBook from right to left.

The program PDF to FlashBook provides multiple different output modes for you to choose: "HTML" is for publishing online, "ZIP" can be much easier for emailing, "EXE" is an intergraded format for quickly viewing, "Burn to CD" to output your digital books directly on CD-ROM.

Detail features include:

- Convert PDF to side-by-side flash booklets.
- Output in 4 different formats: HTML, EXE, Zip and Burn to CD.

HTML allows you to upload to a website to be viewed online.

EXE and Zip allow you to send to your user by email to be viewed on their computer.

Burn to CD allows you to burn to disk so you can send out with physical media.

- Provide multiple templates with previewing effects instantly.
- Set eBook title and margin manually.
- Define flash window and page background color.
- Insert background music, always play or define times.
- Set background color, image or flash.
- Show thumbnails at the very beginning with defining background color.
- Enable full screen and zoom in.
- Allow view from right to left.
- Auto and loop play slides from the very beginning.
- Export and save settings for future uses.

2. Tutorial Panel

PDF to FlashBook

Display two PDF pages in same Flash screen

User Documentation

Tutorial	
Tutorial Title	www.a-pdf.com
Hide Page Frame Bar	No
Top Margin	10
Bottom Margin	10
Left Margin	60
Right Margin	60
Flash Window Color	#5B5F2C
Page Background Color	#FFFFFF
Background Config	
RightToLeft	No
PageMove Time	1
PageRiseOrFallTime	0.5
Slide Interval	3
AutoPlay	No
LoopPlay	Yes

(1) Tutorial Title

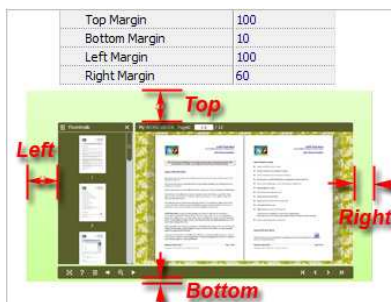

Customize tutorial title for showing on the top of your presentation.

(2) Hide Page Frame Bar

If don't want to show the frame bar on the left or the right side of the pages, choose "Yes" in this option.

(3) Top/ Bottom/ Left/ Right Margin:

(4) Flash Window Color

This color will be applied on all flash windows, such as the "Help" window, booklet window and so on.

(5) Page Background Color

When the page hasn't been loaded completely, it will show with the "Page Background Color" on the page.

(6) Background Config

A. Background Color

Define Outer or Inner background for your flipbook with gradient color or pure color (the same color for "Gradient Color A" and "Gradient Color B"). Gradient Angle is the angle between the two colors.

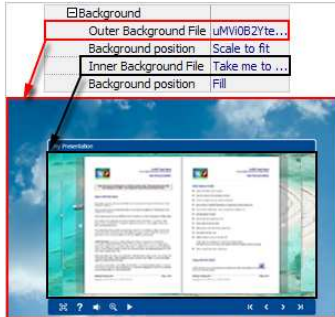

B. Background Image

PDF to FlashBook

Display two PDF pages in same Flash screen

User Documentation

The template enables you to add two background images: Outer Image and Inner Image. You can make Inner background image to show special information, such as advertisement or company logo, etc. There are also 11 kinds of "Image Position" for you to choose: Scale to fit, Fill, Top Left, Top Center, Top Right, Middle Left, Middle Center, Middle Right, Bottom Left, Bottom Center and Bottom Right.

(7) Right to Left

If you want to show your presentations from right to left (such as Arabic language file), then choose "Yes" in "Right to Left" option:

(8) Time Settings

PageMove Time	1
PageRiseOrFallTime	0.5

Set PageMoveTime and PageRiseOrFall Time in seconds according to your needs. (Recommended second values are 1 and 0.5).

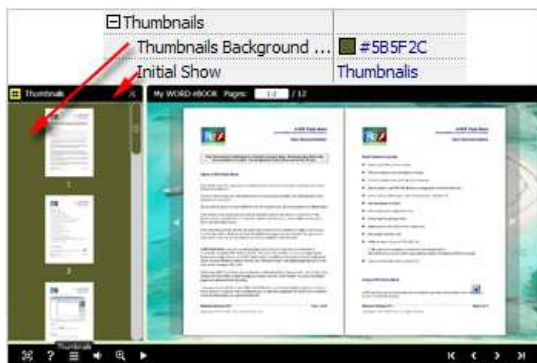

(9) Auto and Loop Play

Slide Interval	3
AutoPlay	Yes
LoopPlay	Yes

To auto play your slides, you can set "Yes" in "AutoPlay" option; then define the Slide Interval (seconds of staying on each page); you can also set "LoopPlay->Yes" to play the slides repeatedly (after clicking the Auto Flip button , the flipbooks will be flipped by staying 3 seconds per page).

3. Thumbnails

You will enable to show page thumbnails in output flash eBook too, and set panel color in "Thumbnails->Thumbnails Background Color". You can also show the thumbnails at the very beginning of opening your flash eBook, just set "Initial Show->Thumbnails".

4. Sound Panel

Sound	
Sound File	Example1....
Sound Loops	-1

If you want to add background sound to your flipbook, such as a song or other audio file, just choose "Sound File" from your computer, then set "Sound Loops", "-1" stands for playing the sound file all the time while viewing flipbook, other value (N>0) stands for the times of playing the sound file.

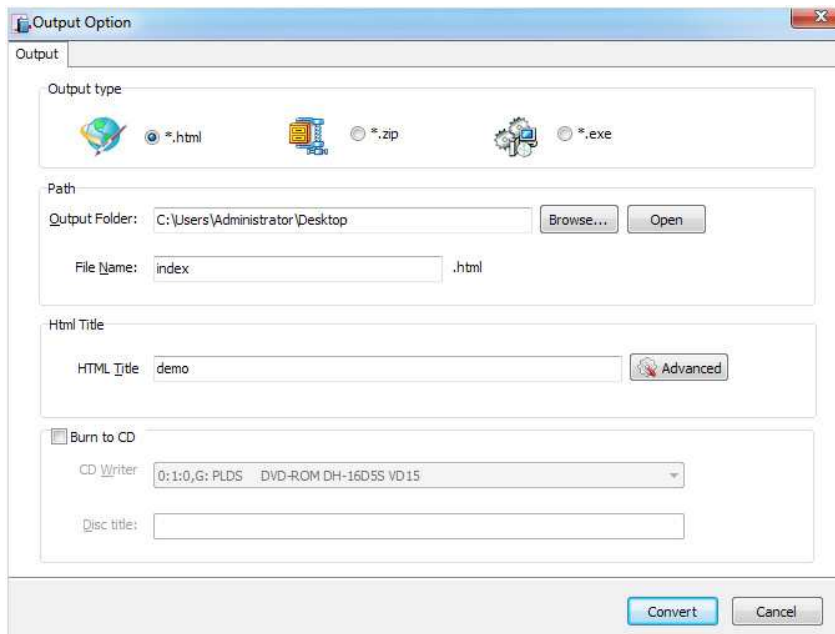

After settings template, click "Apply Change" button

III. Output

Click "Convert to flash" button  to enter into output option interface:

Output types:

1. HTML

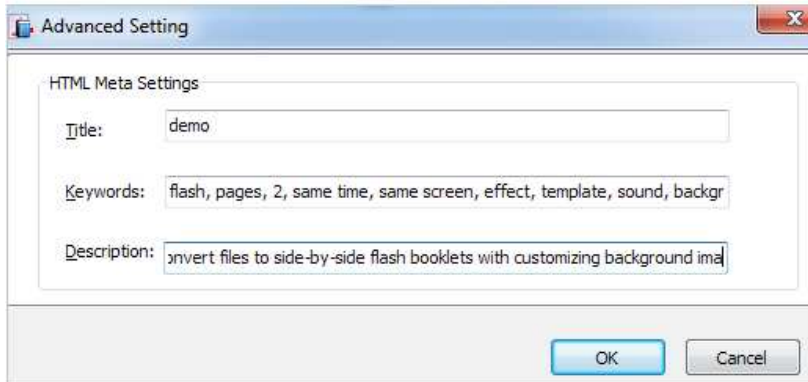

This output type is for uploading created flash booklets onto websites:

You can define HTML Title and other properties by clicking "Advanced" button:

Set Keywords and Description in the below interface:

You will get two separate files "HTML" and "SWF", a "files" folder under your defined path:

Double-click the HTML file to view your created flash presentation online.

If you want to show the Flash file on your website, make sure upload all these files under a same FTP path.

2. ZIP

This output type is for compressing the created files into an integral ZIP package which can be sending out as attachment directly. You can define HTML Advanced Settings by clicking "Advanced" icon: 

Your recipients just need to uncompress the ZIP file and then they can view the HTML flipbook instantly:

3. EXE

This type is for outputting flash presentation as a single executive file, easy storing and easy viewing:

You can also define Icon and Opening Window Size in Advanced Settings:

You can even **burn the output flipbook to CD**:

After choosing output type, then check the option "Burn to CD", set "CD Writer", define "Disc title", at last click  button to output flash presentation in your defined type.
